

# Administering Information Protection and Compliance in Microsoft 365 (SC-400T00)

## COURSE OVERVIEW

As an information protection and compliance administrator, you plan and implement risk and compliance controls in the Microsoft Purview compliance portal.

In this role, you translate an organization's risk and compliance requirements into technical implementation. You're responsible for implementing and managing solutions for content classification, data loss prevention (DLP), information protection, data lifecycle management, records management, privacy, risk, and compliance.

You work with other roles that are responsible for governance, data, and security to evaluate and develop policies to address an organization's risk reduction and compliance goals. You assist workload administrators, business application owners, human resources departments, and legal stakeholders to implement technology solutions that support the necessary policies and controls.

## WHO WILL BENEFIT FROM THIS COURSE?

The information protection administrator translates an organization's risk and compliance requirements into technical implementation. They are responsible for implementing and managing solutions for content classification, data loss prevention (DLP), information protection, data lifecycle management, records management, privacy, risk, and compliance. They also work with other roles that are responsible for governance, data, and security to evaluate and develop policies to address an organization's risk reduction and compliance goals. This role assists workload administrators, business application owners, human resources departments, and legal stakeholders to implement technology solutions that support the necessary policies and controls.

## PREREQUISITES

You should have experience with Microsoft 365 services, including:

- Microsoft 365 Apps
- Microsoft Exchange Online
- Microsoft SharePoint
- Microsoft OneDrive
- Microsoft Teams
- You should also be familiar with PowerShell.

## **COURSE OBJECTIVES**

Students will learn to:

- Introduction to information protection and data lifecycle management in Microsoft Purview
- Classify data for protection and governance
- Create and manage sensitive information types
- Understand Microsoft 365 encryption
- Deploy Microsoft Purview Message Encryption
- Protect information in Microsoft Purview
- Apply and manage sensitivity labels
- Prevent data loss in Microsoft Purview
- Configure DLP policies for Microsoft Defender for Cloud Apps and Power Platform
- Manage data loss prevention policies and reports in Microsoft 365
- Manage the data lifecycle in Microsoft Purview
- Manage data retention in Microsoft 365 workloads
- Manage records in Microsoft Purview
- Explore compliance in Microsoft 365
- Search for content in the Microsoft Purview compliance portal
- Manage Microsoft Purview eDiscovery (Standard)
- Manage Microsoft Purview eDiscovery (Premium)
- Manage Microsoft Purview Audit (Standard)
- Prepare Microsoft Purview Communication Compliance
- Manage insider risk in Microsoft Purview
- Implement Microsoft Purview Information Barriers
- Manage regulatory and privacy requirements with Microsoft Priva
- Implement privileged access management
- Manage Customer Lockbox

## **COURSE OUTLINE**

Module 1: Introduction to Information Protection and Data Lifecycle Management in Microsoft Purview

- Discuss information protection and data lifecycle management and why it's important.
- Describe Microsoft's approach to information protection and data lifecycle management.
- Define key terms associated with Microsoft's information protection and data lifecycle management solutions.
- Identify the solutions that comprise information and data lifecycle management in Microsoft Purview.

Module 2: Classify data for protection and governance

- List the components of the Data Classification solution.
- Identify the cards available on the Data Classification overview tab.
- Explain the Content explorer and Activity explorer.
- Describe how to use sensitive information types and trainable classifiers.

### Module 3: Create and manage sensitive information types

- Recognize the difference between built-in and custom sensitivity labels
- Configure sensitive information types with exact data match-based classification
- Implement document fingerprinting
- Create custom keyword dictionaries

### Module 4: Understand Microsoft 365 Encryption

- Explain how encryption mitigates the risk of unauthorized data disclosure.
- Describe Microsoft data-at-rest and data-in-transit encryption solutions.
- Explain how Microsoft 365 implements service encryption to protect customer data at the application layer.
- Understand the differences between Microsoft managed keys and customer managed keys for use with service encryption.

### Module 5: Deploy Microsoft Purview Message Encryption

- Configure Microsoft Purview Message Encryption for end users
- Implement Microsoft Purview Advanced Message Encryption

### Module 6: Protect information in Microsoft Purview

- Discuss the information protection solution and its benefits.
- List the customer scenarios the information protection solution addresses.
- Describe the information protection configuration process.
- Explain what users will experience when the solution is implemented.
- Articulate deployment and adoption best practices.

### Module 7: Apply and manage sensitivity labels

- Apply sensitivity labels to Microsoft Teams, Microsoft 365 groups, and SharePoint sites.
- Monitor label usage using label analytics.
- Configure on-premises labeling.
- Manage protection settings and marking for applied sensitivity labels.
- Apply protections and restrictions to email.
- Apply protections and restrictions to files.

### Module 8: Prevent data loss in Microsoft Purview

- Discuss the data loss prevention solution and its benefits.
- Describe the data loss prevention configuration process.
- Explain what users experience when the solution is implemented.

### Module 9: Configure DLP policies for Microsoft Defender for Cloud Apps and Power Platform

- Describe the integration of DLP with Microsoft Defender for Cloud Apps.
- Configure policies in Microsoft Defender for Cloud Apps.

### Module 10: Manage data loss prevention policies and reports in Microsoft 365

- Review and analyze DLP reports.
- Manage permissions for DLP reports.
- Identify and mitigate DLP policy violations.
- Mitigate DLP violations in Microsoft Defender for Cloud Apps.

#### Module 11: Manage the data lifecycle in Microsoft Purview

- Discuss the Data Lifecycle Management solution and its benefits.
- List the customer scenarios the Data Lifecycle Management solution addresses.
- Describe the Data Lifecycle Management configuration process.
- Explain what users will experience when the solution is implemented.
- Articulate deployment and adoption best practices.

#### Module 12: Manage data retention in Microsoft 365 workloads

- Describe the retention features in Microsoft 365 workloads.
- Configure retention settings in Microsoft Teams, Yammer, and SharePoint Online.
- Recover content protected by retention settings.
- Regain protected items from Exchange Mailboxes.

#### Module 13: Manage records in Microsoft Purview

- Discuss the Microsoft Purview Records Management solution and its benefits.
- List the customer scenarios the Microsoft Purview Records Management solution addresses.
- Describe the Microsoft Purview Records Management configuration process.
- Explain what users will experience when the solution is implemented.
- Articulate deployment and adoption best practices.

#### Module 14: Explore compliance in Microsoft 365

- Describe how Microsoft 365 helps organizations manage risks, protect data, and remain compliant with regulations and standards.
- Plan your beginning compliance tasks in Microsoft Purview.
- Manage your compliance requirements with Compliance Manager.
- Manage compliance posture and improvement actions using the Compliance Manager dashboard.
- Explain how an organization's compliance score is determined.

#### Module 15: Search for content in the Microsoft Purview compliance portal

- Describe how to use content search in the Microsoft Purview compliance portal.
- Design and create a content search.
- Preview the search results.
- View the search statistics.
- Export the search results and search report.
- Configure search permission filtering.

#### Module 16: Manage Microsoft Purview eDiscovery (Standard)

- Describe how Microsoft Purview eDiscovery (Standard) builds on the basic search and export functionality of Content search.
- Describe the basic workflow of eDiscovery (Standard).
- Create an eDiscovery case.
- Create an eDiscovery hold for an eDiscovery case.
- Search for content in a case and then export that content.
- Close, reopen, and delete a case.

#### Module 17: Manage Microsoft Purview eDiscovery (Premium)

- Describe how Microsoft Purview eDiscovery (Premium) builds on eDiscovery (Standard).
- Describe the basic workflow of eDiscovery (Premium).
- Create and manage cases in eDiscovery (Premium).
- Manage custodians and non-custodial data sources.
- Analyze case content and use analytical tools to reduce the size of search result sets.

#### Module 18: Manage Microsoft Purview Audit (Standard)

- Describe the differences between Audit (Standard) and Audit (Premium).
- Identify the core features of the Audit (Standard) solution.
- Set up and implement audit log searching using the Audit (Standard) solution.
- Export, configure, and view audit log records.
- Use audit log searching to troubleshoot common support issues.

#### Module 19: Prepare Microsoft Purview Communication Compliance

- List the enhancements in communication compliance over Office 365 Supervision policies, which it will replace.
- Explain how to identify and remediate code-of-conduct policy violations.
- List the prerequisites that need to be met before creating communication compliance policies.
- Describe the types of built-in, pre-defined policy templates.

#### Module 20: Manage insider risk in Microsoft Purview

- Explain how Microsoft Purview Insider Risk Management can help prevent, detect, and contain internal risks in an organization.
- Describe the types of built-in, pre-defined policy templates.
- List the prerequisites that need to be met before creating insider risk policies.
- Explain the types of actions you can take on an insider risk management case.

#### Module 21: Implement Microsoft Purview Information Barriers

- Describe how information barriers can restrict or allow communication and collaboration among specific groups of users.
- Describe the components of an information barrier and how to enable information barriers.
- Understand how information barriers help organizations determine which users to add or remove from a Microsoft Team, OneDrive account, and SharePoint site.
- Describe how information barriers prevent users or groups from communicating and collaborating in Microsoft Teams, OneDrive, and SharePoint.

#### Module 22: Manage regulatory and privacy requirements with Microsoft Priva

- Create and manage risk management policies for data overexposure, data transfer, and data minimization
- Investigate and remediate risk alerts
- Send user notifications
- Create and manage Subject Rights Requests
- Estimate and retrieve subject data
- Review subject data
- Create subject rights reports

#### Module 23: Implement privileged access management

- Explain the difference between privileged access management and privileged identity management.
- Describe the privileged access management process flow.
- Describe how to configure and enable privileged access management.

#### Module 24: Manage Customer Lockbox

- Describe the Customer Lockbox workflow.
- Explain how to approve or deny a Customer Lockbox request.
- Explain how you can audit actions performed by Microsoft engineers when access requests are approved.

---

### WHY TRAIN WITH SUNSET LEARNING INSTITUTE?

Sunset Learning Institute (SLI) has been an innovative leader in developing and delivering authorized technical training since 1996. Our goal is to help our customers optimize their technology Investments by providing convenient, high quality technical training that our customers can rely on. We empower students to master their desired technologies for their unique environments.

What sets SLI apart is not only our immense selection of trainings options, but our convenient and consistent delivery system. No matter how complex your environment is or where you are located, SLI is sure to have a training solution that you can count on!

#### Premiere World Class Instruction Team

- All SLI instructors have a four-year technical degree, instructor level certifications and field consulting work experience
- Sunset Learning has won numerous Instructor Excellence and Instructor Quality Distinction awards since 2012

#### Enhanced Learning Experience

- The goal of our instructors during class is ensure students understand the material, guide them through our labs and encourage questions and interactive discussions.

#### Convenient and Reliable Training Experience

- You have the option to attend classes live with the instructor, at any of our established training facilities, or from the convenience of your home or office
- All Sunset Learning Institute classes are guaranteed to run – you can count on us to deliver the training you need when you need it!

#### Outstanding Customer Service

- You will work with a dedicated account manager to suggest the optimal learning path for you and/or your team
- An enthusiastic student services team is available to answer any questions and ensure a quality training experience
